Zotin, J.L. and Faro, Jr., A.C.
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57

Subject Index

Acid sites
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331

Acidity
Oxidizing and reducing properties of SAPO-37 molecular sieve. Comparison with acidity and catalysis 311

Adsorption
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87

Alcohol synthesis
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267

Alcohols (higher)
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267

Alkene hydroformylation
Ruthenium catalyzed hydroformylation reactions using in situ generation of synthesis gas from aqueous methyl formate 289

Alkylamines
Acid-base bifunctional catalysis in the decomposition of alkylamines 75

Alumina
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57

Alumina
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1

Aluminium–zirconium–boron
Catalytic cracking properties of Al-Zr-B composite pillared clays 33

Aluminophosphate molecular sieves
Aluminophosphate-based molecular sieves synthesized in the presence of di-n-propylamine and 1-methylimidazole: Are the templates related? L9

Aromatization
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331

Basic sites
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331

Basicity
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57

Calcium oxide–cerium oxide
Hydrogen formation by steam-reforming and water–gas-shift reaction in the oxidative methane coupling reaction over calcium oxide–cerium dioxide catalysts 299

Carbon monoxide
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267

Carbon monoxide
Hydrogenation of carbon monoxide over the mixed catalysts composed of cobalt–nickel/manganese oxide–zirconium oxide and zeolite catalysts 225

Carbon supports
Influences of surface modification of carbon supports on the nickel-catalyzed vapor phase carbonylation of methanol 45

Catalyst characterization (adsorption, TPR, XPS, XRD)
Influences of surface modification of carbon supports on the nickel-catalyzed vapor phase carbonylation of methanol 45

Catalyst characterization (adsorption, XRD)
Shape selective catalysis by zeolite KZ-1: Synthesis, characterization and isomerization of m-xylene 281

Catalyst characterization (adsorption, XRD)
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237

Catalyst characterization (AEM, TPR, XPS, XRD)
Titania-modified hydrodesulfurization catalysts. Part 2. Dispersion state and catalytic activity of MoO_3 supported on titania–alumina carrier 179

Catalyst characterization (BET, EDX, TEM, XRD)
Stabilization of alumina by addition of lanthanum 119
Catalyst characterization (BET, IR, XRD)
Catalytic cracking properties of Al-Zr-B composite pillared clays 33
Catalyst characterization (BET, TPD, acidity)
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Catalyst characterization (EM, ESCA, XRD)
Characterization of the standard nickel/silica catalyst EuroNi-1. III. Investigations of catalyst structure 193
Catalyst design
Designing FCC catalysts with high-silica Y zeolites 1
Catalyst preparation (hydrothermal)
Shape selective catalysis by zeolite KZ-1: Synthesis, characterization and isomerization of m-xylene 281
Catalyst preparation (ion exchange)
Cracking of n-decane over lanthanum-Y catalysts. Comparison of lanthanum-Y catalysts obtained by solid-state ion exchange and ion exchange in solution 343
Catalyst preparation (wet impregnation)
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237
Catalytic cracking
Designing FCC catalysts with high-silica Y zeolites 1
Chlorine
Redispersion of palladium in Y-zeolites by chlorine 93
Chloromethane
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Claus process
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57
Clusters
Hydrodesulfurization over model sulfide cluster-derived catalysts 249
Coal
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Cobalt–nickel/manganese oxide–zirconium oxide
Hydrogenation of carbon monoxide over the mixed catalysts composed of cobalt–nickel/manganese oxide–zirconium oxide and zeolite catalysts 225
Coke formation
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Coke formation
Designing FCC catalysts with high-silica Y zeolites 1
Composite pillared interlayered clay
Catalytic cracking properties of Al-Zr-B composite pillared clays 33
Cracking catalysts
Catalytic cracking properties of Al-Zr-B composite pillared clays 33
Crystallite size
Characterization of the standard nickel/silica catalyst EuroNi-1. III. Investigations of catalyst structure 193
Cyclization
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331
Cyclization
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87
Deamination/dealkylation
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
n-Decane cracking
Cracking of n-decane over lanthanum-Y catalysts. Comparison of lanthanum-Y catalysts obtained by solid-state ion exchange and ion exchange in solution 343
Dehydrogenation
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Dehydrohalogenation
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Effectiveness factor
Effectiveness factor of plate catalyst grain for reactions with degree kinetics 41
Ethane dehydrogenation
Comparison of the oxidative dehydrogenation of ethane and oxidative coupling of methane over rare earth oxides 321

EuroNi-1
Characterization of the standard nickel/silica catalyst EuroNi-1. III. Investigations of catalyst structure 193
FCC
Designing FCC catalysts with high-silica Y zeolites 1
Gasoline synthesis
Hydrogenation of carbon monoxide over the mixed catalysts composed of cobalt–nickel/manganese oxide–zirconium oxide and zeolite catalysts 225
H-ZSM-5
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87
n-Hexane reforming
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331
High-silica Y zeolites
Designing FCC catalysts with high-silica Y zeolites 1
Hybrid catalyst
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Hydrodesulphurization
Titania-modified hydrodesulfurization catalysts. Part 2. Dispersion state and catalytic activity of MoO_3 supported on titania–alumina carrier 179
Hydrodesulphurization
Hydrodesulfurization over model sulfide cluster-derived catalysts 249
Hydrogen sulphide
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57
Hydrogen transfer
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Hydrogenation
Hydrogenation of carbon monoxide over the mixed catalysts composed of cobalt–nickel/manganese oxide–zirconium oxide and zeolite catalysts 225
Hydroliquefaction
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Hydrotreatment
Hydrodesulfurization over model sulfide cluster-derived catalysts 249
Ion exchange
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Iron oxide
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Iron sulphide
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Kinetics
Effectiveness factor of plate catalyst grain for reactions with degree kinetics 41
Lanthanum
Cracking of n-decane over lanthanum-Y catalysts. Comparison of lanthanum-Y catalysts obtained by solid-state ion exchange and ion exchange in solution 343
Lanthanum-modified aluminas
Stabilization of alumina by addition of lanthanum 119
Lead
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Magnesium oxide
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Methane oxidation
Partial oxidation of methane to formaldehyde on chlorine-promoted catalysts 153
Methane oxidative coupling
Comparison of the oxidative dehydrogenation of ethane and oxidative coupling of methane over rare earth oxides 321
Methane oxidative coupling
Hydrogen formation by steam-reforming and water–gas-shift reaction in the oxidative methane coupling reaction over calcium oxide–cerium dioxide catalysts 299
Methanol carbonylation

Influences of surface modification of carbon supports on the nickel-catalyzed vapor phase carbonylation of methanol 45
Methyl formate
Ruthenium catalyzed hydroformylation reactions using in situ generation of synthesis gas from aqueous methyl formate 289
Methylene chloride
Partial oxidation of methane to formaldehyde on chlorine-promoted catalysts 153
1-Methylimidazole
Aluminophosphate-based molecular sieves synthesized in the presence of di-n-propylamine and 1-methylimidazole: Are the templates related? L9
Molecular sieves
Aluminophosphate-based molecular sieves synthesized in the presence of di-n-propylamine and 1-methylimidazole: Are the templates related? L9
Molybdenum carbides
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267
Nickel–molybdenum
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Nickel/carbon
Influences of surface modification of carbon supports on the nickel-catalyzed vapor phase carbonylation of methanol 45
Nickel/silica
Characterization of the standard nickel/silica catalyst EuroNi-1. III. Investigations of catalyst structure 193
Nitrogen monoxide
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1
1-Octene
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87
Organometallics
Hydrodesulfurization over model sulfide cluster-derived catalysts 249
Paladium/titania
Partial oxidation of methane to formaldehyde on chlorine-promoted catalysts 153
Palladium
Redispersion of palladium in Y-zeolites by chlorine 93
Perovskite structure
Stabilization of alumina by addition of lanthanum 119
Phthalic anhydride
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237
Pillared interlayered clay
Catalytic cracking properties of Al-Zr-B composite pillared clays 33
Platinum
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331
Pore size
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57
Potassium
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267
Propane
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1
di-n-Propylamine
Aluminophosphate-based molecular sieves synthesized in the presence of di-n-propylamine and 1-methylimidazole: Are the templates related? L9
Rare earth oxides
Comparison of the oxidative dehydrogenation of ethane and oxidative coupling of methane over rare earth oxides 321
Redispersion
Redispersion of palladium in Y-zeolites by chlorine 93
Redox properties
Oxidizing and reducing properties of SAPO-37 molecular sieve. Comparison with acidity and catalysis 311
Regeneration
Redispersion of palladium in Y-zeolites by chlorine 93
Ruthenium

Ruthenium catalyzed hydroformylation reactions using in situ generation of synthesis gas from aqueous methyl formate 289
SAPO-37
Oxidizing and reducing properties of SAPO-37 molecular sieve. Comparison with acidity and catalysis 311
Schulz-Flory distribution
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267
Secondary methane activation
Partial oxidation of methane to formaldehyde on chlorine-promoted catalysts 153
Selective reduction
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1
Selectivity
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Selectivity (alcohols)
Mixed alcohol synthesis from carbon monoxide and dihydrogen over potassium-promoted molybdenum carbide catalysts 267
Selectivity (formaldehyde)
Partial oxidation of methane to formaldehyde on chlorine-promoted catalysts 153
Selectivity (gasoline)
Designing FCC catalysts with high-silica Y zeolites 1
Selectivity (shape-)
Shape selective catalysis by zeolite KZ-1: Synthesis, characterization and isomerization of m-xylene 281
Side-chain cyclization
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87
Silanization
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Silica
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1
Silica–alumina
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
Sintering
Stabilization of alumina by addition of lanthanum 119
Sintering
Redispersion of palladium in Y-zeolites by chlorine 93
Solid-state ion exchange
Cracking of n-decane over lanthanum-Y catalysts. Comparison of lanthanum-Y catalysts obtained by solid-state ion exchange and ion exchange in solution 343
Steam reforming
Hydrogen formation by steam-reforming and water–gas-shift reaction in the oxidative methane coupling reaction over calcium oxide–cerium dioxide catalysts 299
Structure
Characterization of the standard nickel/silica catalyst EuroNi-1. III. Investigations of catalyst structure 193
Sulphides
Hydrodesulfurization over model sulfide cluster-derived catalysts 249
Sulphur dioxide
Effect of basicity and pore size distribution of transition aluminas on their performance in the hydrogen sulphide–sulphur dioxide reaction 57
Syngas generation
Ruthenium catalyzed hydroformylation reactions using in situ generation of synthesis gas from aqueous methyl formate 289
Templates
Aluminophosphate-based molecular sieves synthesized in the presence of di-n-propylamine and 1-methylimidazole: Are the templates related? L9
Thiele parameter
Effectiveness factor of plate catalyst grain for reactions with degree kinetics 41
Tin
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Tin oxide
Influence of catalysts upon hydrogen transfer pathways during hydroliquefaction of coal 105
Titania glass
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237

Titania–alumina
Titania-modified hydrodesulfurization catalysts. Part 2. Dispersion state and catalytic activity of MoO_3 supported on titania–alumina carrier 179
Titania–zirconia
Effects of acidic and basic properties on selectivity in the reforming of n-hexane over a binary oxide of titanium and zirconium supporting a platinum catalyst 331
Transition metals
Transition metal-promoted silica and alumina catalysts for the selective reduction of nitrogen monoxide with propane L1
Vanadia–titania
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237
Water–gas shift reaction
Hydrogen formation by steam-reforming and water–gas-shift reaction in the oxidative methane coupling reaction over calcium oxide–cerium dioxide catalysts 299
m-Xylene isomerization
Shape selective catalysis by zeolite KZ-1: Synthesis, characterization and isomerization of m-xylene 281
o-Xylene oxidation
Oxidation of o-xylene over vanadium-porous titania glass catalysts 237
Y-type zeolite
Redispersion of palladium in Y-zeolites by chlorine 93
Y-type zeolites
Designing FCC catalysts with high-silica Y zeolites 1
Zeolites
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
Zeolites
Designing FCC catalysts with high-silica Y zeolites 1
Zeolites
Redispersion of palladium in Y-zeolites by chlorine 93
Zeolites
Oxidizing and reducing properties of SAPO-37 molecular sieve. Comparison with acidity and catalysis 311
Zeolites
Hydrogenation of carbon monoxide over the mixed catalysts composed of cobalt–nickel/manganese oxide–zirconium oxide and zeolite catalysts 225
Zeolites
Shape selective catalysis by zeolite KZ-1: Synthesis, characterization and isomerization of m-xylene 281
Zeolites
Retained and desorbed products from reaction of 1-octene over H-ZSM5 zeolite 87
Zeolites
Cracking of n-decane over lanthanum-Y catalysts. Comparison of lanthanum-Y catalysts obtained by solid-state ion exchange and ion exchange in solution 343
Zirconium dioxide
Acid-base bifunctional catalysis in the decomposition of alkylamines 75
ZSM-5
Conversion of chloromethane over metal-exchanged ZSM-5 to higher hydrocarbons 133
